Subject Index

Adsorbents
Microscopic investigations of the surface of carbon–silica adsorbents with consideration of heterogeneity of carbon layer studied by transmission electron microscopy, and its correlation with adsorption data 203

Alkenes, terminal
Mineral-catalysed transformations of terminal alkenes during pyrolysis 191

Aromatics
Degradation of polyethylene to aromatic hydrocarbons over metal-supported activated carbon catalysts 331

Aryl ethers
Pyrolysis–gas chromatography–mass spectrometry of two trimeric lignin model compounds with alkyl–aryl ether structure 135

Bacillus cereus
Pyrolysis–tandem mass spectrometry of bacteria 7

Bacillus subtilis
Pyrolysis–tandem mass spectrometry of bacteria 7

Bacteria
Pyrolysis–tandem mass spectrometry of bacteria 7

Bentonite
Mineral-catalysed transformations of terminal alkenes during pyrolysis 191

1,3-Butadien-1-amine
Flow and flash-vacuum pyrolyses of 2-cyclohexen-1-ol and 2-cyclohexen-1-amine: a rapid access to 1,3-butadien-1-ol and 1,3-butadien-1-amine 171

1,3-Butadien-1-ol
Flow and flash-vacuum pyrolyses of 2-cyclohexen-1-ol and 2-cyclohexen-1-amine: a rapid access to 1,3-butadien-1-ol and 1,3-butadien-1-amine 171

n-Butane
Thermal cracking of *n*-butane and a light hydrocarbon mixture 37

^{14}C Analysis
An investigation of the insoluble carbonaceous material in airborne particulates from vehicular traffic 83

Candida albicans
Pyrolysis–direct chemical ionization mass spectrometry of the dimorphic fungus *Candida albicans* and the pleomorphic fungus *Ophiostoma ulmi* 309

Carbohydrates
Curie-point pyrolysis–capillary gas chromatography–high-resolution mass spectrometry of microcrystalline cellulose 237

Carbon, activated
Degradation of polyethylene to aromatic hydrocarbons over metal-supported activated carbon catalysts 331

Carbon–silica adsorbents
Microscopic investigations of the surface of carbon–silica adsorbents with consideration of heterogeneity of carbon layer studied by transmission electron microscopy, and its correlation with adsorption data 203

Catalysts
Degradation of polyethylene to aromatic hydrocarbons over metal-supported activated carbon catalysts 331

Cellulose
Kinetics of cellulose pyrolysis in the presence of nitric oxide 149

Cellulose
Curie-point pyrolysis–capillary gas chromatography–high-resolution mass spectrometry of microcrystalline cellulose 237

Chemotaxometry
Chemical characterization of leafy spurge (*Euphorbia esula* L.) by Curie-point pyrolysis–gas chromatography–pattern recognition 223

Coal
Comparative study of the isothermal pyrolysis kinetic behaviour of some oil shales and coals 49

Coal
Fossil fuels and synthetic polymers: isothermal pyrolysis kinetics as indication of structural resemblance 73

Coal
Matrix isolation–Fourier transform infrared spectroscopy studies of flash pyrolysis of four coal tars 99

Coal
Matrix isolation–Fourier transform infrared

spectroscopy studies of slow pyrolysis processes for four coals 115
Curie-point pyrolysis
Chemical characterization of leafy spurge (*Euphorbia esula* L.) by Curie-point pyrolysis–gas chromatography–pattern recognition 223

Degradation
Degradation of polyethylene to aromatic hydrocarbons over metal-supported activated carbon catalysts 331
Direct chemical ionization
Pyrolysis–direct chemical ionization mass spectrometry of the dimorphic fungus *Candida albicans* and the pleomorphic fungus *Ophiostoma ulmi* 309
Discriminant analysis
Pyrolysis–direct chemical ionization mass spectrometry of the dimorphic fungus *Candida albicans* and the pleomorphic fungus *Ophiostoma ulmi* 309

cis-1,2-Elimination
Laser-powered homogeneous decomposition of isobornyl acetate. Evidence for rearrangement reactions in the gas phase 179
ESCA
Characterization of the solid residues of vacuum pyrolysis of *Populus tremuloides* 281
Escherichia coli
Pyrolysis–tandem mass spectrometry of bacteria 7
Euphorbia cyparissias L.
Chemical characterization of leafy spurge (*Euphorbia esula* L.) by Curie-point pyrolysis–gas chromatography–pattern recognition 223
Euphorbia esula L.
Chemical characterization of leafy spurge (*Euphorbia esula* L.) by Curie-point pyrolysis–gas chromatography–pattern recognition 223

Flame ionization detection
Development of a pyrolysis–gas chromatographic–Fourier transform infrared spectroscopic technique for the study of woody peats 295
Flash pyrolysis
Matrix isolation–Fourier transform infrared spectroscopy studies of flash pyrolysis of four coal tars 99
Fourier transform infrared spectroscopy
Matrix isolation–Fourier transform infrared spectroscopy studies of flash pyrolysis of four coal tars 99
Fourier transform infrared spectroscopy
Matrix isolation–Fourier transform infrared spectroscopy studies of slow pyrolysis processes for four coals 115
Fourier transform infrared spectroscopy
Development of a pyrolysis–gas chromatographic–Fourier transform infrared spectroscopic technique for the study of woody peats 295
Fuels
Comparative study of the isothermal pyrolysis kinetic behaviour of some oil shales and coals 49
Fuels
Fossil fuels and synthetic polymers: isothermal pyrolysis kinetics as indication of structural resemblance 73
Fungi
Pyrolysis–direct chemical ionization mass spectrometry of the dimorphic fungus *Candida albicans* and the pleomorphic fungus *Ophiostoma ulmi* 309

Gas chromatography
Pyrolysis of tetralin at 450 °C 17
Gas chromatography
An investigation of the insoluble carbonaceous material in airborne particulates from vehicular traffic 83
Gas chromatography
Pyrolysis–gas chromatography–mass spectrometry of two trimeric lignin model compounds with alkyl–aryl ether structure 135
Gas chromatography
Studies on thermal decomposition of nitrocellulose by pyrolysis–gas chromatography 163
Gas chromatography
Mineral-catalysed transformations of terminal alkenes during pyrolysis 191
Gas chromatography
Chemical characterization of leafy spurge (*Euphorbia esula* L.) by Curie-point pyrolysis–gas chromatography–pattern recognition 223
Gas chromatography
Curie-point pyrolysis–capillary gas chromatography–high-resolution mass spectrometry of microcrystalline cellulose 237
Gas chromatography
Development of a pyrolysis–gas chromatographic–Fourier transform infrared spectroscopic technique for the study of woody peats 295
Gas chromatography
Pyrolysis–gas chromatography of separated zones on thin-layer chromatograms. IV. Application to the determination of some sulfonamide drugs 323

Helium
Pyrolysis–gas chromatography–mass spectrometry of two trimeric lignin model compounds with alkyl–aryl ether structure 135
Hexachlorobenzene
Thermal decomposition of pentachlorobenzene, hexachlorobenzene and octachlorostyrene in air 25
High-resolution mass spectrometry
Curie-point pyrolysis–capillary gas chromatography–high-resolution mass spectrometry of microcrystalline cellulose 237

Illinois No. 6
Matrix isolation–Fourier transform infrared spectroscopy studies of flash pyrolysis of four coal tars 99
Illinois No. 6
Matrix isolation–Fourier transform infrared spectroscopy studies of slow pyrolysis processes for four coals 115
Illite
Mineral-catalysed transformations of terminal alkenes during pyrolysis 191
Infrared spectrometry
Studies on thermal decomposition of nitrocellulose by pyrolysis–gas chromatography 163
Inhibitor
Pyrolysis–gas chromatography–mass spectrometry of two trimeric lignin model compounds with alkyl–aryl ether structure 135
Insoluble carbonaceous material
An investigation of the insoluble carbonaceous material in airborne particulates from vehicular traffic 83
Isobornyl acetate
Laser-powered homogeneous decomposition of isobornyl acetate. Evidence for rearrangement reactions in the gas phase 179
Isotopes
Comments on "Sulphur Isotope Composition of H_2S Evolved during Nonisothermal Pyrolysis of Sulphur-containing Materials" by H.R. Krouse, R.G.S. Ritchie and R.S. Roche 1
Isotopes
Response to Comments by A.K. Burnham on "Sulphur Isotopes Composition of H_2S Evolved during Nonisothermal Pyrolysis of Sulphur-containing Materials" by H.R. Krouse, R.G.S. Ritchie and R.S. Roche 3

Kaolinite
Mineral-catalysed transformations of terminal alkenes during pyrolysis 191
Kerogens
Comparative study of the isothermal pyrolysis kinetic behaviour of some oil shales and coals 49
Kerogens
Fossil fuels and synthetic polymers: isothermal pyrolysis kinetics as indication of structural resemblance 73
Kerogens
Mineral-catalysed transformations of terminal alkenes during pyrolysis 191
Kinetics, reaction
Comparative study of the isothermal pyrolysis kinetic behaviour of some oil shales and coals 49
Kinetics, reaction
Fossil fuels and synthetic polymers: isothermal pyrolysis kinetics as indication of structural resemblance 73

Laser induced thermolysis
Efficient gas phase polymer deposition by infrared laser-photosensitized decomposition of 4-silaspiro[3.4]octane 345
Levoglucosan
Curie-point pyrolysis–capillary gas chromatography–high-resolution mass spectrometry of microcrystalline cellulose 237
Lignin
Characterization of the solid residues of vacuum pyrolysis of *Populus tremuloides* 281
Lignin model compounds
Pyrolysis–gas chromatography–mass spectrometry of two trimeric lignin model compounds with alkyl–aryl ether structure 135
LPG
Thermal cracking of *n*-butane and a light hydrocarbon mixture 37

Mass spectrometry
Pyrolysis–tandem mass spectrometry of bacteria 7
Mass spectrometry
Pyrolysis of tetralin at 450 °C 17
Mass spectrometry
An investigation of the insoluble carbonaceous material in airborne particulates from vehicular traffic 83
Mass spectrometry
Pyrolysis–gas chromatography–mass spectrometry of two trimeric lignin model compounds with alkyl–aryl ether structure 135
Mass spectrometry
Curie-point pyrolysis–capillary gas chromatography–high-resolution mass spectrometry of microcrystalline cellulose 237
Mass spectrometry
Development of a pyrolysis–gas chromatographic–Fourier transform infrared spectroscopic technique for the study of woody peats 295

Mass spectrometry
Pyrolysis–direct chemical ionization mass spectrometry of the dimorphic fungus *Candida albicans* and the pleomorphic fungus *Ophiostoma ulmi* 309
Morphology
Microscopic investigations of the surface of carbon–silica adsorbents with consideration of heterogeneity of carbon layer studied by transmission electron microscopy, and its correlation with adsorption data 203
Multivariate pattern recognition
Chemical characterization of leafy spurge (*Euphorbia esula* L.) by Curie-point pyrolysis–gas chromatography–pattern recognition 223

Nitric oxide
Pyrolysis–gas chromatography–mass spectrometry of two trimeric lignin model compounds with alkyl–aryl ether structure 135
Nitrocellulose
Studies on thermal decomposition of nitrocellulose by pyrolysis–gas chromatography 163
Nomenclature
Pyrolysis nomenclature 219

Octachlorostyrene
Thermal decomposition of pentachlorobenzene, hexachlorobenzene and octachlorostyrene in air 25
Oil shale
Comparative study of the isothermal pyrolysis kinetic behaviour of some oil shales and coals 49
Oil shale
Fossil fuels and synthetic polymers: isothermal pyrolysis kinetics as indication of structural resemblance 73
Oil shale
Mineral-catalysed transformations of terminal alkenes during pyrolysis 191
Ophiostoma ulmi
Pyrolysis–direct chemical ionization mass spectrometry of the dimorphic fungus *Candida albicans* and the pleomorphic fungus *Ophiostoma ulmi* 309

Peat
Development of a pyrolysis–gas chromatographic–Fourier transform infrared spectroscopic technique for the study of woody peats 295
Pentachlorobenzene
Thermal decomposition of pentachlorobenzene, hexachlorobenzene and octachlorostyrene in air 25
Petroleum gases, liquefied
Thermal cracking of *n*-butane and a light hydrocarbon mixture 37
Pittsburgh bituminous
Matrix isolation–Fourier transform infrared spectroscopy studies of flash pyrolysis of four coal tars 99
Pittsburgh bituminous
Matrix isolation–Fourier transform infrared spectroscopy studies of slow pyrolysis processes for four coals 115
Polyethylene
Fossil fuels and synthetic polymers: isothermal pyrolysis kinetics as indication of structural resemblance 73
Polyethylene
Degradation of polyethylene to aromatic hydrocarbons over metal-supported activated carbon catalysts 331
Polymer deposition
Efficient gas phase polymer deposition by infrared laser-photosensitized decomposition of 4-silaspiro[3.4]octane 345
Polymers
Fossil fuels and synthetic polymers: isothermal pyrolysis kinetics as indication of structural resemblance 73
Polystyrene
Fossil fuels and synthetic polymers: isothermal pyrolysis kinetics as indication of structural resemblance 73
Populus tremuloides
Characterization of the solid residues of vacuum pyrolysis of *Populus tremuloides* 281
1-Pristene
Mineral-catalysed transformations of terminal alkenes during pyrolysis 191

Rawhide sub-bituminous
Matrix isolation–Fourier transform infrared spectroscopy studies of flash pyrolysis of four coal tars 99
Rawhide sub-bituminous
Matrix isolation–Fourier transform infrared spectroscopy studies of slow pyrolysis processes for four coals 115
Reaction mechanism
Pyrolysis of tetralin at 450 °C 17
Rearrangement reactions
Laser-powered homogeneous decomposition of isobornyl acetate. Evidence for rearrangement reactions in the gas phase 179
Retro-Diels–Alder reaction
Flow and flash-vacuum pyrolyses of 2-cyclohexen-1-ol and 2-cyclohexen-1-amine: a rapid access to 1,3-butadien-1-ol and 1,3-butadien-1-amine 171

Scavenger
Pyrolysis–gas chromatography–mass spectrometry of two trimeric lignin model compounds with alkyl–aryl ether structure 135
4-Silaspiro[3.4]octane
Efficient gas phase polymer deposition by infrared laser-photosensitized decomposition of 4-silaspiro[3.4]octane 345
Slow pyrolysis
Matrix isolation–Fourier transform infrared spectroscopy studies of slow pyrolysis processes for four coals 115
Sulfonamides
Pyrolysis–gas chromatography of separated zones on thin-layer chromatograms. IV. Application to the determination of some sulfonamide drugs 323
Sulphur
Comments on "Sulphur Isotope Composition of H_2S Evolved during Nonisothermal Pyrolysis of Sulphur-containing Materials" by H.R. Krouse, R.G.S. Ritchie and R.S. Roche 1
Sulphur
Response to Comments by A.K. Burnham on "Sulphur Isotopes Composition of H_2S Evolved during Nonisothermal Pyrolysis of Sulphur-containing Materials" by H.R. Krouse, R.G.S Ritchie and R.S. Roche 3

Tandem mass spectrometry
Pyrolysis–tandem mass spectrometry of bacteria 7
Tar
Matrix isolation–Fourier transform infrared spectroscopy studies of flash pyrolysis of four coal tars 99
Tar
Matrix isolation–Fourier transform infrared spectroscopy studies of flow pyrolysis processes for four coals 115
Tetralin
Pyrolysis of tetralin at 450 °C 17
Texas lignite
Matrix isolation–Fourier transform infrared spectroscopy studies of flash pyrolysis of four coal tars 99
Texas lignite
Matrix isolation–Fourier transform infrared spectroscopy studies of slow pyrolysis processes for four coals 115
Thermal decomposition
Thermal decomposition of pentachlorobenzene, hexachlorobenzene and octachlorostyrene in air 25
Thermal decomposition
Studies on thermal decomposition of nitrocellulose by pyrolysis–gas chromatography 163
Thermal degradation mechanisms
Pyrolysis–gas chromatography–mass spectrometry of two trimeric lignin model compounds with alkyl–aryl ether structure 135
Thermogravimetric analysis
An investigation of the insoluble carbonaceous material in airborne particulates from vehicular traffic 83
Thermogravimetric analysis
Pyrolysis–gas chromatography–mass spectrometry of two trimeric lignin model compounds with alkyl–aryl ether structure 135
Thin-layer chromatography
Pyrolysis–gas chromatography of separated zones on thin-layer chromatograms. IV. Application to the determination of some sulfonamide drugs 323
Topography
Microscopic investigations of the surface of carbon–silica adsorbents with consideration of heterogeneity of carbon layer studied by transmission electron microscopy, and its correlation with adsorption data 203
Transmission electron microscopy
Microscopic investigations of the surface of carbon–silica adsorbents with consideration of heterogeneity of carbon layer studied by transmission electron microscopy, and its correlation with adsorption data 203
Two-patches adsorbents
Microscopic investigations of the surface of carbon–silica adsorbents with consideration of heterogeneity of carbon layer studied by transmission electron microscopy, and its correlation with adsorption data 203

1-Undecene
Mineral-catalysed transformations of terminal alkenes during pyrolysis 191
